CAPABILITY STATEMENT · OCTOBER 2026

Y.P. Seaton & Associates Company Limited

From small beginnings in 1969 as electrical and mechanical engineering contractors, Y.P. Seaton & Associates grew into a general civil engineering and building contractor. Today its work for government agencies includes shoreline protection, sewage conveyance, housing infrastructure, irrigation and road works.

FOUNDED	OFFICE
1969	Kingston 10
MANAGING DIRECTOR	
York Seaton	
CONTRACTS LISTED BELOW	
8 · J$1.77 billion combined published value	

CORE SERVICES

Shoreline and coastal protection. Rock revetments, composite revetments and concrete walls that protect roads, runways and communities from erosion, overtopping and storm surge.

Housing and infrastructure development. Roads, water supply, drainage and sewerage for housing schemes, and the low- and middle-income housing solutions the firm was founded to deliver.

General building construction. Residential and commercial buildings for private and public clients, including drawings prepared and submitted for approval, and estimates.

Water, sewerage and irrigation. Force mains, sewage lift stations, septic and biodigester tanks, irrigation systems and storm-water drainage for public agencies and developers.

Roads, retaining walls and drainage. Road construction, repair and maintenance, with the retaining walls, gullies and culverts that keep hillside roads open after heavy rain.

Electrical and mechanical engineering. Where the firm began in 1969: electrical and mechanical installation, construction, maintenance and repair.
